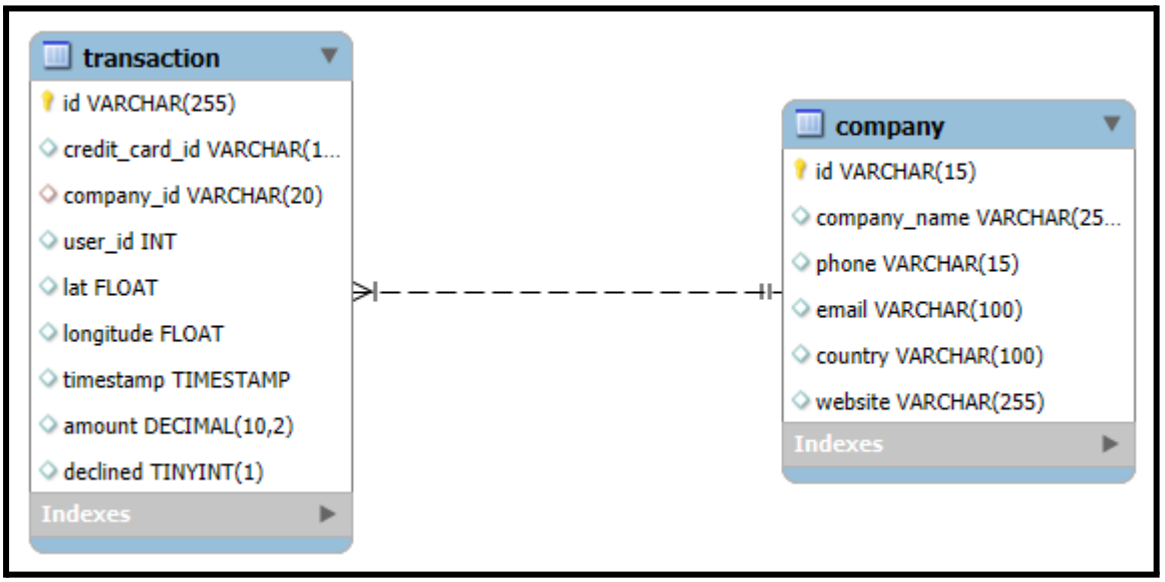
NIVEL 1 - EXERCICI 1

Mostra les característiques principals de l'esquema creat i explica les diferents taules i variables que existeixen. Assegura't d'incloure un diagrama que il·lustri la relació entre les diferents taules i variables.



CARDINALIDAD

La tabla transaction está vinculada con la tabla company en **una relación de muchos a uno** (M:1). Diferentes filas ubicadas en la tabla transaction pueden estar vinculadas a una sola fila de la tabla company.

CLAVES

Las tablas transaction y company contienen sus **PRIMARY KEYS** respectivas que **identifican de forma única** cada una de sus transacciones y compañías. La tabla transaction contiene la **FOREIGN KEY** company_id mediante la cuál identifica de forma única la **PRIMARY KEY** id de company permitiendo la unión de ambas tablas dentro del esquema.

NIVEL 1 - EXERCICI 2

```sql
DESCRIBE transaction;
DESCRIBE company;
SELECT * FROM transaction ORDER BY RAND() LIMIT 100;
SELECT * FROM company ORDER BY RAND() LIMIT 100;
